

## **Hardware Systems – Assembly Technician**

With over 20 years of experience, Process Solutions Canada Limited integrates proven technologies with our cement industry targeted software to provide systems for shipping automation, production quality management, and provision of advanced control. Process Solutions is the leading supplier of cement shipping systems in North America, and a leading supplier of Laboratory LIMS as well as Raw Mix Control Systems throughout the world. At Process Solutions, we take pride in everything we do and care about our customers, our people and our products. We provide a work environment conducive to the growing needs of our employees, and together are building a world-class company.

Our Edmonton location has an immediate need for an individual to be responsible, under supervision, for the assembly and wiring of automation components into industrial cabinets; and a variety of associated activities including management and inventory of hardware in our test environments and for client projects, shipping/receiving of components and assemblies, and involvement in selection and purchasing of technical components and parts. Opportunity exists for longer term growth and development, in installation and client support.

Interested candidates must possess the following:

- Pride in workmanship, with strong attention to detail
- An ability to work independently and in a team environment
- Familiarity with hand tools and a workshop environment
- Exposure to electrical wiring and/or electronics
- Proven soldering skills
- Strong organizational skills and self-motivation
- Good trouble-shooting and analytical skills
- Good interpersonal and communication skills
- Must be physically fit to perform the responsibilities of the position

These additional qualifications would be an asset:

- Technical school training
- Experience with the assembly of electronic components
- Experience with PC hardware configuration and software installation
- Industrial experience in a lab or plant environment
- Exposure to process control and/or PLCs
- Experience with AutoCAD
- Exposure to the electrical trade / electrical process equipment and ability to read electrical drawings

**Interested candidates should apply with resume and covering letter, via email to:**
