

Intermediate Windows Developer

With over 20 years of experience, Process Solutions Canada Limited integrates proven technologies with our cement industry targeted software to provide systems for shipping automation, production quality management, and provision of advanced control. Process Solutions is the leading supplier of cement shipping systems in North America, and a leading supplier of Laboratory LIMS as well as Raw Mix Control Systems throughout the world. At Process Solutions, we take pride in everything we do and care about our people, our customers and our products.

We are looking for an energetic and passionate individual experienced in designing and writing commercial applications in Visual Basic to fill an immediate opening for an intermediate-level developer. As a growing firm, we require team players with a commitment to excellence and a dedication to meeting the needs of the customer. The successful candidate will work as a key member of one of our portfolio teams, based in our Edmonton office.

The successful candidate will also possess the following attributes:

- One of:
 - University degree in Computer Science or Computer Engineering
 - Computer Diploma from a registered technical school
- Minimum of 2 years experience developing Windows-based business applications
- One or more years experience with Visual Basic 6.0 or VB.NET (ActiveX, ADO, Source Safe)
- Strong interpersonal and communication skills both written and oral
- Experience with SQL and relational databases such as SQL Server or Oracle
- Experience with translating and documenting user requirements
- Knowledge of software design and testing methodologies
- Ability to work independently and in a team environment

These additional qualifications would be an asset:

- Experience using OOP methodologies
- Experience designing graphical user interfaces
- Experience with code-reuse strategies with multiple developers
- Experience with reporting tools such as Crystal reports or SQL Server Reporting services
- Experience developing rich web applications
- Strong verbal and written skills in a language other than English preferably Spanish or French
- Industrial experience in a lab or plant environment

Interested candidates should apply with resume and covering letter:
