

## Senior/Intermediate Windows Developer

Process Solutions Canada Limited has an immediate need for a senior or intermediate-level developer experienced in designing and writing commercial applications in Visual Basic. The successful candidate will work as a key member in one of our primary development teams, based in our Edmonton office.

Process Solutions is a Canadian based developer and distributor of Automated Laboratory Management, Bulk Shipping Automation and Distributed Control System software for customers in North America, and the Pacific Rim countries. Our systems incorporate real-time commercial transaction management, physical process control and instrumentation, interfaces with technical apparatus and customer ERP systems, and production of documents and reports. In many cases, we design and integrate hardware/software assemblies as core components of an overall solution.

The successful candidate will also possess the following attributes:

- One of:
  - University degree in Computer Science or Computer Engineering
  - Computer Diploma from a registered technical school
  - or equivalent experience and/or education
- Minimum of 3 years experience developing Windows-based business applications
- Exceptional English language skills both verbal and written.
- One or more years experience with Visual Basic 6.0 (ActiveX, ADO, Source Safe)
- Experience with relational databases such as Oracle and SQL Server
- A strong understanding of structured query language (SQL)
- Strong interpersonal and communication skills
- Knowledge of software design and testing methodologies
- Ability to work independently and in a team environment

These additional qualifications would be an asset:

- Experience in leading/mentoring other developers
- Experience with VB.NET, ADO.NET
- Experience designing graphical user interfaces
- Experience with code-reuse with other developers
- Experience using OOP methodologies
- Experience in interfacing with process equipment
- Experience with Crystal Reports
- Experience with Windows API functions
- Experience with C/C++/C#
- Industrial experience in a lab or plant environment
- Strong verbal and written skills in a language other than English preferably Spanish or French

**Interested candidates should apply with resume and covering letter:**
