CRM Developer

Are you up for a challenge? Do you like being involved in all aspects of product development? Are you passionate about your craft as well as the technology of programming?

We are a leading supplier of software and automation services to the global cement industry. Since 1985, we have provided advanced control, laboratory management and automated shipping systems around the world. We are successful because we listen to our customers, take pride in what we do, and have an amazing team.

We are seeking a contractor for a three-month term to design and implement Microsoft Dynamics CRM solutions. The ideal candidate will develop and maintain a platform roadmap, customizing the system to meet the business needs of the company

Core Competency Requirements

- Proficient in developing, coding, customizing, integrating Microsoft Dynamics CRM
- Demonstrated proficiency in installing and deploying CRM Organizations
- Demonstrated proficiency in customizing and creating CRM entities
- Demonstrated proficiency in understanding and implementing business workflows and processes
- Demonstrated proficiency in using the either the CRM SDK or plugin platforms. Demonstrated proficiency with Microsoft .NET development using C#
- Experience with source control management systems and continuous integration/deployment environments
- Internally motivated, able to work proficiently both independently and in a team environment
- Proven communication skills
- Strong drive to find ways to improve solutions, systems, and processes

Preferred Competency Requirements

- Experience with supporting Microsoft products (SQL Server, SharePoint)
- Microsoft Certified Technology Specialist (MCTS) for Microsoft Dynamics CRM 2011
- Experience working on an agile development team

Education:

- Diploma or degree in Software Development, Computer Science, Computer Engineering or other relevant discipline
- 3 – 5 years of related experience or combination of relevant education and experience

Experience with any of the following is an asset:

- Reporting using SQL Server Reporting Services or Crystal Reports
- Source control tools such as Team Foundation Server, Git or Subversion
- Software design and testing methodologies
- Integrate existing systems and services into the CRM architecture.
- Assist with documentation and training activities
