

Business Analyst (Software)

You're a listener – and you can break down complex problems and explain your thinking. Are you up for a real challenge? We have a backlog of functional requirements work that needs your enthusiasm. We are a leading supplier of software and automation services to the global cement industry. Since 1985, we have provided advanced control, laboratory management and automated shipping systems around the world. We are successful because we listen to our customers, take pride in what we do, and have an amazing team!

We are seeking a Business Analyst to join our product and project teams. You will work alongside other business analysts and report directly to the Vice President. Your main tasks will include performing detailed requirements analysis, documenting processes, and performing some user acceptance testing. To succeed in this role you should have a natural analytical way of thinking and be able to explain difficult concepts to non-technical users

Duties and Responsibilities:

- Create direct channels of communication to software and application developers that get the job done without managerial interjection
- Identify business trends utilizing real data, compile analysis reports that are delivered to developers and then follow-up on all results

Qualification and Skills:

- Bachelor's or Master's degree in a related field
- 5+ years of associated work experience
- Advanced SQL database management and maintenance skills
- Practical application ability with Microsoft Office and Visio
- Experience in Rational Unified Process
- Experience in Scrum Framework and Agile processes
- Detailed analytical abilities
- Strong experience in user acceptance testing
- A track record of following through on commitments
- Excellent planning, organizational, and time management skills
- Experience leading and developing top performing teams
- A history of leading and supporting successful projects

This is a full-time employee only role: contractors and placement agencies should not contact us regarding this role. You must have the right to work in Canada before applying for this position. Process Solutions is an equal opportunity employer, and we pride ourselves on our cultural diversity.

We are a growing company with a unique market and technical specialty that offers a friendly, inclusive and interactive work environment. We offer our employees a competitive benefit package including medical benefits and an RRSP matching plan. If you are passionate about your craft, we'd love to hear from you with a resume and cover letter via email outlining why you would be the perfect fit for our team. Send applications to
